

HEALTH SAFETY & ENVIRONMENTAL POLICY

Policy Statement

Clee Hill Plant Ltd is committed to protecting the health, safety & environment of our employees and the communities in which we operate.

We recognise that by integrating sound health, safety & environment management practices into all aspects of our business we can provide our services safely while protecting the natural resources for future generations.

Clee Hill Plant Ltd is committed to fulfilling its legal requirements and compliance obligations and to continually improve its Health, Safety & Environmental Management Systems to provide a safe working environment to eliminate hazards, reduce OH&S risks and reduce environmental impact including the prevention of pollution.

Our Guiding Principles are to: -

- Meet or exceed all applicable health, safety & environmental requirements. We will evaluate our health, safety & environmental performance against planned objectives by monitoring results and through periodic management reviews
- Communicate our Health, Safety & Environmental Policies and Procedures to employees and stakeholders
- Promote employee participation in health, safety & environmental matters through consultation, co-operation and effective training
- Advocate the adoption of our Health, Safety & Environmental Principles and Practices by contractors and suppliers working either on the Company's or its Customer's premises
- Provide adequate resources to enable a safe working environment for all employees and contractors consistent with regulatory requirements and best management practices.
- Ensure that employees fulfil their responsibilities by compliance with the Company's Health, Safety & Environmental Policies and Procedures
- Promote environmental sustainability and carbon reduction by: -
 - Reduction in use of raw materials where practicable
 - Re-use of resources and materials whenever possible
 - Recycling surplus materials associated with our business whenever possible. Materials that cannot be recycled will be disposed of in line with legislation and best management practices
 - Efficient use of energy
- Maintain ISO 14001:2015 Environment Management System Accreditation.
